REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 43-48 recite a memory circuit comprising an address-input circuit, a data-input circuit, an internal circuit which writes the data signals supplied from the data-input circuit in memory cells indicated by the address signals supplied from the address-input circuit, and a bypass circuit provided in parallel to the delay circuit, wherein the address signals pass through the bypass circuit and bypass the delay circuit in a data-read mode.

The advantage of the invention is to provide an address buffer wherein the address-latch circuit supplies the addresses to the address buffer without a clock-cycle delay during read operation.

The prior art does not teach or suggest the above memory device having all the elements as recited in claims 43 and 44. Therefore, the application is in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
